**A SUPPLEMENT TO THE MONTHLY
FOREIGN AGRICULTURAL TRADE OF THE UNITED STATES**

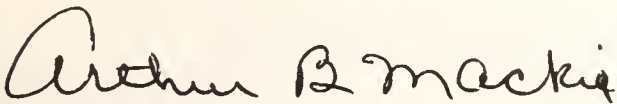

Economic Research Service / U.S. DEPARTMENT OF AGRICULTURE

343461

241544
FOREWARD

This issue of the Annual Supplement to the Foreign Agricultural Trade of the United States introduces two additional new features: Expanded area coverage and a combination of two previously published separate reports giving trade data by countries and by commodities. The area coverage was expanded so that trade data could be grouped by developed and less developed countries to facilitate international comparisons and analysis. The two Annual Supplements (By Countries and By Commodities) were combined to reduce publication costs and to facilitate the accessibility and use of these data.

As with all new procedures, automatic data processing involves some changes in methods and data classification. For example, export data classifications under the Bureau of the Census Schedule B were changed January 1970 and necessitated an expanded presentation of the data under the old and new Schedule B for this year since complete comparability was impossible. These changes in data classification necessarily expanded the volume of data presented for this year but will not be required for subsequent years. These changes were initiated by the Bureau of the Census to increase comparability of U.S. trade data with other trade statistics published by various international organizations. Some of these changes are discussed in the SPECIAL NOTICE section of this publication.

ARTHUR B. MACKIE, Chief
Trade Statistics and Analysis Branch

FEBRUARY 1971

SPECIAL NOTICE

This publication is a statistical reference for agricultural exports and imports of the most recent two years. In addition, historical series are presented for the major commodities and commodity groups. Selection of data for the two-year tables is based on both years. Area tables have been expanded to include the following: Caribbean Free Trade Association, Australia and New Zealand, and Africa, excluding Republic of South Africa. This publication also contains three additional tables, a world total for agricultural commodities by Schedule B, TSUSA, and Schedule A commodity codes. Items in some tables may not add to totals because of rounding.

Exports

Commodity-by-country data (table 7) are printed at the 7-digit Schedule B commodity code level. Statistics on commodities valued at less than \$1 million were not published but are available for reference from Agricultural Specialist machine tabulations, at Trade Statistics and Analysis Branch, Foreign Development and Trade Division, Economic Research Service, U.S. Department of Agriculture. "Basket" or "catchall" classifications were also excluded since they do not provide meaningful data. Commodity codes listed under country data include in 1969 the old Schedule B codes which became obsolete effective January 1970 and the new Schedule B codes which replace them. Countries listed under each commodity accounted for 0.3 percent or more of the commodity's export value. The value of commodities from selected countries was subtracted from each commodity total to derive "other countries."

Country-by-commodity data (table 8) cover countries having agricultural export trade totals of \$1 million or more. The value of commodities exported to each country was summed and listed for the country at a 5-digit Schedule B level if

the commodity total was 0.5 percent or more of the agricultural exports to that country, with the following exceptions: Commodities to Canada, United Kingdom, the Netherlands, France, West Germany, and Japan were listed if they accounted for 0.1 percent or more. Commodities exported to Mexico, Belgium and Luxembourg Italy, and the Philippines were listed if they accounted for 0.2 percent or more. The 5-digit Schedule B codes as reported by the Bureau of the Census may include both agricultural and nonagricultural products. The 5-digit codes designated by an asterisk (*) in this report exclude the nonagricultural commodities. Value of selected commodities was subtracted from each country total to derive the "other agricultural products."

In commodity group-by-country data (table 10), 7-digit Schedule B commodity codes were summed to group totals. Each of the countries listed under each group accounted for 0.3 percent or more of the commodity group's export value with the following exceptions: Wheat, rice, feed grains, grains and preparations, corn, wheat and wheat products, grain sorghums, wheat and wheat flour, feed grains and products, and nonfat dry milk were listed if they accounted for 0.1 percent or more.

Imports

Commodity-by-country data (table 21) are printed at the 7-digit Schedule A commodity code level. The 7-digit Schedule A codes as reported by the U.S. Bureau of the Census may include both agricultural and nonagricultural products. The 7-digit codes designated by an asterisk (*) in this report exclude the nonagricultural commodities. Basket classifications were excluded. Statistics on commodities valued at less than \$1 million are available but not published. Each of the countries listed under each commodity accounted for 0.3 percent or more of the commodity's import value. The value of commodities from selected countries was subtracted from each commodity total to derive "other countries."

Country-by-commodity data (table 22) cover countries having agricultural import trade totals of \$1 million or more. The value of commodities imported from each country was summed and listed for the country of origin at a 5-digit Schedule A level if the commodity total was 0.3 percent or more of the agricultural imports from that country, with the following exceptions: Commodities from Canada, Mexico, Brazil, Argentina, and Australia are listed if they account for 0.1 percent or more. The 5-digit Schedule A codes as reported by the Bureau of the Census may include both agricultural and nonagricultural. The 5-digit codes designated by an asterisk (*) in this report exclude the nonagricultural commodities. Value of selected countries was subtracted from each country total to derive the "other agricultural products."

In commodity group-by-country data (table 24), 7-digit TSUSA commodity codes were summed to group totals. Each of the countries listed under each group accounted for 0.3 percent or more of the commodity group's import value with the following exceptions: Bananas and plantains, green coffee, cocoa beans, crude rubber, pork, and raw sugar were listed if they accounted for 0.1 percent or more.

MLD	Milled	#	Pound

Explanatory Note

U.S. foreign agricultural trade statistics in this report include official U.S. data based on compilations of the Bureau of the Census. Agricultural commodities consist of (1) nonmarine food products and (2) other products of agriculture which have not passed through complex processes of manufacture such as raw hides and skins, fats and oils, and wine. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and intransit through the United States from one foreign country to another when documented as such through U.S. Customs.

EXPORTS The export statistics also exclude shipments to the U.S. armed forces and diplomatic missions abroad for their own use and supplies for vessels and planes engaged in foreign trade. Data on shipments valued at less than \$251 are not compiled by commodity and are excluded from agricultural statistics but are reflected in nonagricultural and overall export totals in this report. The agricultural export statistics include shipments under P.L. 83-480 (Agricultural Trade Development and Assistance Act), and related laws; under P.L. 87-195 (Act for International Development); and involving Government payments to exporters. (USDA payments are excluded from the export value.) Separate statistics on Government program exports are compiled by USDA from data obtained from operating agencies.

The export value, the value at the port of exportation, is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port. The country of destination is the country of ultimate destination or where the commodities are to be consumed, further processed, or manufactured. When the shipper does not know the ultimate destination, the shipments are credited to the last country, as known to him at the time of shipment from the United States, to which the commodities are to be shipped in their present form. Except for Canada, export shipments valued at \$251-\$499 are included on the basis of sampling estimates; shipments to Canada valued at \$251-\$1,999 are sampled.

IMPORTS Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. Data on shipments valued at less than \$251 are estimated on the basis of a 1-percent sample and are not compiled by commodity. They are excluded from agricultural statistics but are reflected in nonagricultural and overall import totals in this report.

The import value, defined generally as the market value in the foreign country, excludes import duties, ocean freight, and marine insurance. The country of origin is defined as the country where the commodities were grown or processed. When the country of origin is not known, the imports are credited to the country of shipment.

Imports similar to agricultural commodities produced commercially in the United States and others that are interchangeable in use to any significant extent with such U.S. commodities are supplementary or partly competitive. All other commodities are complementary or noncompetitive.

Further explanatory material on foreign trade statistics and compilation procedures of the Bureau of the Census is contained in the publications of that agency.

Country of destination not reported				6/10,344	-10,344
Total all countries	41,068,174	34,421,852	6,646,322	980,071	5,666,251
Special category total <u>7/</u>	12,188				
Total domestic exports	41,080,362				

1/ Exclusive of special category commodities. (For security reasons detailed subgroup and country of destination are not shown in published export statistics for a selected list referred to as "Special category" commodities).

2/ Because of transshipments, the value of U.S. exports are overstated to such countries as Canada, the Netherlands, and Belgium and understated to such countries as West Germany, United Kingdom, Switzerland, Ireland, Italy, Denmark, Sweden, Norway, and others. For details of transshipments through Canada and the Netherlands, see tables 13 and 14.

3/ Includes programs authorized by Public Law 83-480, the Agricultural Trade Development and Assistance Act of 1954, as amended, and by Public Law 87-195, the Foreign Assistance Act of 1961, as amended.

4/ "Total agricultural exports outside specified Government programs" (sales for dollars) include, in addition to unassisted commercial transactions, shipments of some commodities with governmental assistance in the form of (1) extensions of credits and guarantees for relatively short periods, (2) sales of Government-owned commodities at less than domestic market prices, and (3) export payments in cash.

5/ The apparent excess of Government-financed exports over total exports may be due to lags in reporting, differences in valuation procedures, or the recording of the export as destined for the country through which transshipment was made.

6/ Donations through the United Nations Relief and Works Agency *UNRWA) for the relief of Palestine refugees.

7/ Not available by countries. (See explanation in 1/).

Note: Total transshipments are assumed to be the difference between Netherlands imports from the United States and U.S. exports to the Netherlands (sources: Central Bureau of Statistics, The Hague, Trade by Commodity; and U.S. Bureau of the Census, FT 410). Transshipments by country of destination were based on monthly reports from the Netherlands Central Bureau of Statistics. Transit Trade with Transshipment by Commodities.

Table 15.--U.S. agricultural imports: Value by commodity or commodity group, fiscal years 1969 and 1970

Commodity or commodity group	1969	1970 <u>1/</u>	Change
	-- <u>1,000 dollars</u> --		<u>Percent</u>
